

MD SAIFUL IMRAN

SOFTWARE ENGINEER

Dhaka, Bangladesh | +880 1630-796340 | iimranafis@gmail.com | [linkedin.com/in/imranafis](https://www.linkedin.com/in/imranafis) | github.com/imranafis

SUMMARY

Full-stack developer and Computer Science undergraduate with hands-on experience shipping production web applications, Chrome extensions (700+ combined active users), and NPM packages (1,500+ downloads), plus a game development background in Unity/C#. Strong problem-solving foundation built through consistent LeetCode practice and competitive programming. Comfortable owning a codebase end to end -- architecture, backend, frontend, and deployment - with a track record of taking projects from idea to published release.

TECHNICAL SKILLS

Frontend: React.js, Next.js, JavaScript

Backend: Node.js, TypeScript, NestJS, Python, RESTful API design, JWT authentication

Databases: PostgreSQL, MySQL, MongoDB, Firestore, Oracle SQL

Tools & Infrastructure: Git/GitHub, Docker, Firebase, NPM, Puppeteer, Selenium, Chrome Extension APIs

Other Languages: C++, C#, Java, Go

Core CS: Data Structures & Algorithms, Software Architecture & Design Patterns, Game Development (Unity, Unreal Engine)

EXPERIENCE

Web Developer -- Notiveapp (Startup)

2025 - 2026

Remote

- Lead full-stack development of Notiveapp, a production web application built from scratch with React.js and Node.js, owning both backend and frontend architecture.
- Design and integrate RESTful APIs and Firebase (data storage and authentication) to power core application features
- Maintain the entire production codebase, enforcing code quality, scalability and consistent development practices through Git.
- Diagnose and fix bugs and optimize performance across the stack to improve reliability and user experience.

PROJECTS

AditorX ([npmjs.com/package/aditorx](https://www.npmjs.com/package/aditorx))

1,500+ downloads on NPM

- Built and published a lightweight, extensible rich text editor package to NPM, offering developers a fast, customizable writing interface for modern web applications.

CRM Workflow Automation Suite

Node.js / python

- Built multiple bots (Node.js/Puppeteer, Python/Selenium, and a Telegram userbot in Python/Telethon) that automate repetitive CRM data-entry and feedback workflows across multiple sites.

Chrome Extensions: AIUB AutoCaptcha & AIUB Form Filler

700+ active users

- Published two extensions on the Chrome Web Store (500+ and 200+ active users) that automate CAPTCHA handling and repetitive form-filling on the AIUB student portal.

MediScrape

- Tool that extracts structured data from prescription documents and builds a patient profile from that data.

Aessenger

- Personal messenger application built from scratch.

Game Development

Unity / C#

- Developed multiple games using C# and Unity; explored game logic and mechanics design.

EDUCATION

American International University-Bangladesh (AIUB)

2023 - 2027

B.Sc. in Computer Science and Engineering (CSE)
